

## Manual Rising Barrier

The APS manual barrier offers an effective and low-cost solution for a wide variety of parking, road access control and traffic management situations.

Manual barriers

This hard working barrier can be locked in the vertical or horizontal position allowing excellent security for any area.

Our manual barriers are constructed with high quality steel and a strong yet lightweight aluminium barrier beam counter-balanced by supporting weights.

<b>Construction</b>	Pivot assembly and counter-weights in mild steel with heavy duty shaft and bearing blocks
<b>Dimensions</b>	3m-7m, pole diameter 75mm
<b>Finish</b>	Blue mechanism and red boom with white adhesive stripes to the boom and powder coated mild steel sections
<b>Fittings</b>	Complete with boom tip support pole, padlock not supplied
<b>Optional fittings</b>	Folding skirt to barrier arm: STOP or NO ENTRY signs
