

## Swing Gates

APS swing gates are designed with ease of installation and flexible specification to the fore.

Constructed from steel with mesh or vertical bar infill, gates can be supplied with a slip latch for padlocking, magnetic locks, & fire escape furniture. Standard specifications are available as single or double leaf styles up to 6m width and 2.2m height. Larger gates are available on request.

We offer automation and access control systems to suit individual site requirements.

### Features

- Tough steel construction with steel mesh or vertical bar infill for maximum security
- Heavy duty hinge and locking mechanisms as standard
- Adjustable and ease of re-hanging after install
- Low maintenance powder coated and epoxy painted finishes available
- Automation and access control systems
